

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed; and to support all the points in docket #00P-1211/PDT, specifically;

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

GE Food Moratorium

Little Marais, MN 5561

Additional Personal Comments: *It will take many years, perhaps generations to know for sure what messing w/ genes will do. In the meantime; the who believe it is safe will use it. The rest of us would like to read the label and decide for ourselves as time goes on.*
